

ATCOR FOR IMAGINE: HAZE REDUCTION, ATMOSPHERIC AND TOPOGRAPHIC CORRECTION

MOTIVATION

Earth-observing satellite sensors map the Earth's surface properties. However, haze from water vapour and aerosol particles influences the recorded signal. In addition, in rugged terrain, varying illumination conditions (sunny and shady hills) modify the "true" spectral behaviour of surfaces. Haze reduction and atmospheric correction with ATCOR for IMAGINE eliminates haze, atmospheric and illumination effects.

ATCOR for IMAGINE is a professional tool for every user of satellite data, no matter whether the aim is to produce a brilliant image without haze or clouds or whether you have to analyse the real reflectance values of the surface. ATCOR for IMAGINE is your choice to get better results.

KEY FEATURES

ATCOR for IMAGINE offers the two options de-hazing and atmospheric/topographic correction. The de-hazing algorithm can turn a hazy data set into a crisp and neat image. Atmospheric/topographic correction results in the output of true reflectance values, in the case of a mountainous relief with greatly reduced shading of the slopes.

HAZE REDUCTION

- Automatic generation of a haze mask from Tasseled Cap Coefficients.
- Processing runs without user interaction.

ATMOSPHERIC CORRECTION

- Determine atmospheric parameters (aerosol type, visibility) individually within the SPECTRA module.
- The atmospheric database includes a wide range of pre-calculated radiative transfer runs for different weather conditions and sun angles employing the MODTRAN-4 code.
- Generation of surface (brightness) maps for thermal band sensors.
- Supported Sensors: ALI-Advanced LI, ALOS AVNIR-2, ASTER, Cartosat PAN, DMC, Formosat-2, Formosat-2 PAN, GeoEye-1, IKONOS 2, IKONOS 2 PAN, IRS-1A/B LISS-2, IRS-1C/D LISS-3, IRS-1C/D PAN, IRS-P6 AWiFS, IRS-P6 LISS-3, IRS-P6 LISS-4, KOMPSAT-2, KOMPSAT-2 PAN, Landsat-4/5 MSS, Landsat-4/5 TM, Landsat-7 ETM+, Landsat-7 PAN, MOS-B, OrbView PAN, OrbView-3, QuickBird, QuickBird PAN, RapidEye, SAC-C / MMRS, SPOT-1/2/3 MS, SPOT-1/2/3 PAN, SPOT-4 MS, SPOT-5 MS, SPOT-5PAN, WorldView-2 MS, WorldView-2 PAN, THEOS, THEOS PAN, Landsat-8 OLI, Pléiades MS
- Calculation of value-added products (e.g. Soil Adjusted Vegetation Index or Leaf Area Index) and surface energy fluxes for thermal band sensors.

APPLICATION

- Multi-temporal and multi-sensoral land cover classification
- Forest damage monitoring
- Surface temperature mapping
- Monitoring of changes over time

USABILITY

- Streamlined and intuitive user interface.
- De-hazing default parameters produce sufficiently good results.
- User manual contains the scientific background and an explanation of all parameters.
- Once selected parameters are stored in a project file and ready for later processing.

PRODUCT PACKAGING / SALES INFORMATION

ATCOR stands for Atmospheric CORrection and is an ERDAS IMAGINE® software solution. ATCOR was originally developed at DLR, the German Aerospace Centre. GEOSYSTEMS GmbH, the German Intergraph® Distributor, integrated ATCOR into IMAGINE.

ATCOR for IMAGINE is an add-on module for ERDAS IMAGINE. ATCOR for IMAGINE is distributed worldwide by GEOSYSTEMS, Germany and by Intergraph and its distributors in their specific regions.

SYSTEM REQUIREMENTS

ATCOR for IMAGINE needs a running ERDAS IMAGINE license with IMAGINE Advantage® minimum. The current version of ATCOR is compatible with IMAGINE 2013. ATCOR is supported on the same platforms as ERDAS IMAGINE 2013.

ABOUT HEXAGON GEOSPATIAL

Hexagon Geospatial helps you make sense of the dynamically changing world. Known globally as a maker of leading-edge technology, we enable our customers to easily transform their data into actionable information, shortening the lifecycle from the moment of change to action. Hexagon Geospatial provides the software products and platforms to a large variety of customers through direct sales, channel partners, and Hexagon businesses. For more information, visit www.hexagongeospatial.com or contact us at marketing@hexagongeospatial.com.

ABOUT IMAGEM

Simplified information helps us focus and solve complex issues. At Imagem we help improve communications and accelerate business by simplifying big data around us into personalised information. We provide intelligent, innovative and dynamic solutions that help people make smarter decisions. Our hybrid solutions on location-based information, spatial analytics and business intelligence help policy makers, managers and end users be more responsive to the ever changing world. Imagem is premium partner of Hexagon Geospatial, and distributor for the Netherlands, Belgium and Luxembourg. For more information visit imagemnl.com.
